

HuddleCamHD VISCA Control Software

HuddleCamHD VISCA Camera Control Software allows users to control up to 16 cameras directly from any PC or Smartphone on your network.

Activate the WebRemote for far-end camera control from mobile devices or computers over LAN, Wi-Fi, WAN IP Networks.

Use the PresetVisualizer to layout your room presets visually. Simply click the area you want to see and a whole new level of control is at your fingertips!

KEY FEATURES

- Up to 500 presets
- WebRemote - Use on any computer/smartphone
- PTZ VisualPad- A visual layout of your camera presets
- Use up to 7 cameras in daisy-chain or 16 cameras in home run mode from one computer
- IPRemote- Remote camera controls via IP
- External IP Address for far end control
- Free trial available upon request

1. Main Controller

The main remote control interface provides convenient pan, tilt, zoom controls along with access to more advanced features such as WebControl and PTZVisual (see page 2).

2. Setting

The Settings screen shows additional video and control settings such as Exposure, White Balance, Auto Pan, Start with Windows, Camera ON/OFF, and more...

3. WebRemote

The WebRemote is accessible from any PC, Mac, Smartphone or Web Browser when the Web Control is turned on in the Main Controller.

4. IPRemote

The IPRemote provides client access to the main controller over a secure socket connection allowing control of the camera connected to your computer with the Main Controller installed.
